FORM SD  
Specialized Disclosure Report

Graco Inc.

(Exact name of registrant as specified in its charter)

Minnesota

(State or other Jurisdiction of  
Incorporation or organization)

001-09249

(Commission File Number)

41-0285640

(IRS Employer Identification  
No.)

88 – 11<sup>th</sup> Avenue Northeast  
Minneapolis, Minnesota

(Address of principal executive offices)

55413

(Zip Code)

Joseph James Humke, (612) 623-6000

(Name and telephone number, including area code, of the person to contact in  
connection with this report.)

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2025.

## **Section 1 - Conflict Minerals Disclosure**

### **Item 1.01 Conflict Minerals Disclosure and Report**

#### **Conflict Minerals Disclosure**

This Form SD of Graco Inc. (the "Company") is filed pursuant to Rule 13p-1 promulgated under the Securities Exchange Act of 1934, as amended, for the reporting period of January 1 to December 31, 2025.

A copy of the Company's Conflict Minerals Report is filed as Exhibit 1.01 to this Form SD and is publicly available at [www.graco.com](http://www.graco.com).

#### **Item 1.02 Exhibit**

As specified in Section 2, Item 2.01 of this Form SD, the Company is hereby filing its Conflict Minerals Report as Exhibit 1.01 to this report.

## **Section 2 - Exhibits**

### **Item 2.01 Exhibits**

The following exhibit is filed as part of this report.

<u>Exhibit No.</u>	<u>Description</u>
<a href="#">1.01</a>	Conflict Minerals Report of Graco Inc.

**Signature**

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

Date: May 19, 2026

GRACO INC.

By: /s/ Joseph James Humke  
Joseph James Humke  
Executive Vice President, General Counsel and Corporate Secretary

**Exhibit 1.01**

**GRACO INC.**  
**Conflict Minerals Report**  
**For the reporting period from January 1, 2025 to December 31, 2025**

This is the Conflict Minerals Report (“Report”) of Graco Inc. (“Graco,” “we,” “our” or “us”) for the 2025 calendar year, pursuant to Rule 13p-1 of the Securities Exchange Act of 1934 (the “Rule”). Certain capitalized terms used but not defined herein have the meanings assigned to them in the Rule. This Report includes the activities of all subsidiaries of Graco that were required to be consolidated during the reporting period, other than any acquired companies that are not yet required by the Rule to be included in this Report.

The Rule requires certain SEC reporting companies that manufacture or contract to be manufactured products for which tantalum, tin, tungsten or gold (“3TG”) are necessary to the functionality or production of such products to disclose annually whether any of the 3TG in such products originated in the Democratic Republic of the Congo or one of its adjoining countries (collectively, the “Covered Countries”). If the company knows that the 3TG necessary to its products originated in the Covered Countries, or has reason to believe that the 3TG may have originated in the Covered Countries and did not or may not have come from scrap or recycled sources, the company must exercise due diligence on the source and chain of custody of the 3TG and prepare and file a Report describing its due diligence measures.

In addition, our review of the conflict minerals surveys received from our suppliers and related conflict minerals reports for the 2025 calendar year found information indicating that some of the smelters or refiners in our supply chain identified the Russian Federation as a possible sourcing location. The information regarding these Russian-origin metals came from third-party suppliers, which in turn obtained the information through their own suppliers in these highly-attenuated, multi-tiered global supply chains. We remain committed to compliance with U.S. and other applicable trade law and sanctions programs, including those targeting Russian parties.

**Graco Overview**

Graco Inc., together with its subsidiaries (“Graco,” “we,” “us,” or “our”), is a multinational manufacturing company that provides technology and expertise for the management of fluids and coatings in a broad range of industrial and commercial applications.

We design, manufacture, and market systems and equipment used to move, measure, mix, control, dispense, and spray fluid and powder materials. Our products are engineered to support critical processes across a variety of end markets, including manufacturing, processing, construction, and maintenance industries.

Certain of our products incorporate components and materials that contain tin, tantalum, tungsten, and gold (“3TG”). These include products that contain control boards, other electronic components, motors, engines, batteries, spray tips, and certain pumps and valves. These materials may be necessary to the functionality or production of such products.

---

## **Company Management Systems**

We have established and maintain internal management systems designed to support the effective implementation, oversight, and continuous improvement of our Conflict Minerals compliance program. These systems are intended to align with the Organization for Economic Co-operation and Development (“OECD”) Due Diligence Guidance framework and to promote responsible sourcing practices throughout our supply chain.

### Conflict Minerals Policy

We have adopted a Conflict Minerals Policy that affirms our commitment to conducting business in an ethical manner, respecting human rights, and complying with all applicable laws and regulations, including Rule 13p-1 under the Securities Exchange Act of 1934 (the “Rule”).

Our policy reflects our support for the responsible sourcing of tin, tantalum, tungsten, and gold (“3TG”) and our expectation that our suppliers share this commitment. It further provides that we are actively engaged with our global supply chain partners to determine the origin of 3TG contained in the components and raw materials supplied to us and to promote increased transparency and responsible sourcing practices over time.

Our Conflict Minerals Policy is publicly available on our website at <http://www.graco.com/us/en/about-graco/conflict-minerals.html>.

### Internal Team

We have established a cross-functional team, supported by executive-level sponsorship, to implement and oversee our Conflict Minerals compliance program. This team includes representatives from procurement, finance, operations, legal, and information systems functions.

The cross-functional team is responsible for coordinating due diligence activities, monitoring program performance, and identifying and addressing supply chain risks. Findings and updates regarding our Conflict Minerals program are reported to designated members of senior management.

### Control Systems

We maintain a series of internal controls and governance mechanisms designed to support responsible supply chain management. These include:

- Our Code of Ethics and Business Conduct, which establishes expectations for ethical behavior for all employees;
  - Our Supplier Code of Conduct, which outlines minimum standards for suppliers, including expectations relating to responsible sourcing and compliance with applicable laws;
  - Supplier onboarding, review, and approval processes, which incorporate consideration of compliance and risk factors; and
-

- Contractual provisions included in purchase orders and sourcing agreements that reinforce supplier compliance obligations.

To support the execution of our program, we have engaged a third-party service provider to assist with the collection, validation, and retention of supply chain information, as well as the identification and assessment of potential supply chain risks and the facilitation of supplier engagement activities.

In addition, we have participated in industry initiatives intended to advance responsible sourcing practices and promote alignment with recognized frameworks, including prior participation in groups such as the Responsible Minerals Initiative (“RMI”) and other industry forums focused on conflict minerals compliance.

#### Supplier Engagement

We maintain processes to engage our first-tier suppliers in support of our due diligence efforts. Suppliers are informed of our expectations through our policies, contractual requirements, and ongoing communications.

We engage suppliers, with the assistance of our third-party service provider, to request Conflict Minerals Reporting Templates (“CMRTs”) for relevant products and materials. These outreach efforts are supplemented by direct communications from Graco to reinforce the importance of supplier participation and to clarify the roles and responsibilities of both Graco and its suppliers in conducting due diligence.

To facilitate communication, we maintain a dedicated email address (conflictminerals@graco.com) through which suppliers may submit information and raise questions. We respond to supplier inquiries and work collaboratively with suppliers to address challenges encountered during the information-gathering process.

We also maintain processes aimed at continuously improving supplier response rates and the quality and completeness of supplier submissions over time.

#### Grievance Mechanism

We maintain established reporting mechanisms through which employees, suppliers, customers, and other stakeholders may raise concerns regarding our business practices, including those related to conflict minerals sourcing and supply chain due diligence. These mechanisms are designed to allow for confidential and, where permitted, anonymous reporting.

#### Records Management

We have a process in place to collect, analyze and retain Conflict Minerals information received from our suppliers. We will maintain records relating to Conflict Minerals supply chain due diligence in accordance with our records retention policy, which provides for retention of such records for five (5) years.

---

### Carry out Independent Third Party Audit of Supply Chain Due Diligence at Identified Points in the Supply Chain

Because we do not have a direct relationship with 3TG smelters or refiners, we do not perform or commission audits of these entities. Instead, we rely on independent third-party audit programs, such as the RMI's Responsible Minerals Assurance Process ("RMAP"), to provide assurance regarding smelter and refiner sourcing practices.

RMAP utilizes independent private sector auditors to assess participating smelters and refiners due diligence practices, including the source of minerals and the chain of custody. We use RMAP audit results, where available, as part of our assessment of supply chain risk.

### Report on Supply Chain Due Diligence

Graco has filed a Form SD and this Report with the Securities Exchange Commission. The filing is available on our website at <https://www.graco.com/us/en/about-graco/conflict-minerals.html>.

## **Reasonable Country of Origin Inquiry**

### Supply Chain

Graco Inc. does not directly source tin, tantalum, tungsten, or gold ("3TG") from mines, smelters, or refiners and is therefore several tiers removed from the upstream extraction and processing of these minerals. As a downstream purchaser, we procure components and raw materials from third-party suppliers, who are themselves generally multiple levels removed from the smelters and refiners that process 3TG.

We conducted an evaluation of our product portfolio and determined that certain products manufactured during the 2025 calendar year contain, or are likely to contain, 3TG that is necessary to the functionality or production of those products. Accordingly, we determined that it was required to conduct a good faith reasonable country of origin inquiry ("RCOI") with respect to such conflict minerals.

To initiate this process, our Sourcing Department performed a structured review to identify components and raw materials that potentially contain 3TG, as well as the first-tier suppliers providing those in-scope items.

### Request for Information

Based on the results of the component and raw material review, we engaged a third-party service provider to assist in conducting our RCOI by surveying in-scope first-tier suppliers. Suppliers were requested to complete the Responsible Minerals Initiative ("RMI") Conflict Minerals Reporting Template ("CMRT"), version 6.5, with respect to the components and raw materials they supply to Graco.

---

Our third-party service provider conducted outreach through multiple email communications and follow-up phone calls to encourage supplier participation and facilitate completion of the CMRT. In addition, Graco supplemented these efforts with direct communications to suppliers to reinforce expectations and improve response rates.

For the 2025 reporting period, we requested CMRT responses from 1,810 in-scope first-tier suppliers and received responses from 1,145 suppliers, representing a response rate of approximately 63%.

### Survey Responses

All submitted CMRTs were subject to review for completeness, consistency, and data quality. We and our third-party service provider monitored supplier submissions to identify incomplete, inconsistent, or otherwise invalid responses. Where such issues were identified, follow-up communications were initiated to request corrections or resubmissions.

Suppliers were provided with feedback regarding validation errors, along with access to training resources and direct support from our third-party service provider, including multilingual assistance, to enhance the accuracy and reliability of the data provided.

We compiled the list of smelters and refiners identified in supplier responses and compared that information against RMI's smelter and refiner database to assess facility validity and Responsible Minerals Assurance Process ("RMAP") audit status.

Based on the information provided:

- Suppliers identified a total of 360 smelters and refiners appearing on the RMI database.
- Of these facilities, 217 were designated as conformant with RMAP assessment protocols, as verified by independent third-party audits.

A significant portion of supplier responses were provided at a company or supplier-defined level, rather than at a product-specific level. As a result, we were generally unable to determine whether any particular smelter or refiner identified by a supplier actually processed the 3TG contained in the specific components or materials supplied to Graco.

### Identification and Assessment of Risk

Risks are identified based on criteria derived from supplier CMRT responses and validated against external data sources, including RMI information. We analyze the CMRT responses for completeness and consistency. Risks are addressed by contacting the supplier, gathering pertinent information, and performing an assessment of the supplier's Conflict Minerals status. The primary risk identified relates to the nature of responses received. Many suppliers provided information at a company or supplier-defined level, which prevents us from determining whether the smelters or refiners listed by those suppliers actually processed the 3TG contained in the components and raw materials supplied to us.

---

Smelters and refiners that are not conformant with the RMAP assessment protocols or have not committed to undergo an RMAP assessment also pose a risk. When a CMRT is received, the smelters and refiners that are reported are examined. Each facility that meets the RMI definition of a smelter or refiner of 3TG is evaluated for risk based on: (i) geographic proximity to the Covered Countries; (ii) known mineral source country of origin; (iii) RMI Responsible Minerals Assurance Process (RMAP) audit status; (iv) credible evidence of unethical or conflict sourcing; and (v) peer assessments conducted by credible third-party sources. When certain high risk facilities are reported, risk mitigation activities are initiated with the supplier so that they can take risk mitigation actions.

In addition, suppliers are evaluated on the strength of their Conflict Minerals programs based on whether: (i) they have a conflict minerals sourcing policy; (ii) their responsible minerals sourcing policy is available on their website; (iii) they require their direct suppliers to source the 3TG from smelters whose due diligence practices have been validated by an independent third party audit program; (iv) they have implemented due diligence measures for responsible sourcing; (v) they conduct Conflict Minerals survey(s) of their relevant suppliers; (vi) they review information received from their suppliers against their own expectations; (vii) their review process includes corrective action management; and (viii) they are required to file an annual conflict minerals disclosure. We evaluate and track the strength of their programs so we can make risk mitigation decisions as their programs progress.

### **Design of Due Diligence Measures**

Our due diligence framework has been designed to conform, in all material respects, with the applicable provisions of the internationally recognized OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas (Third Edition), including the related supplements for tin, tantalum, tungsten, and gold.

### **Due Diligence Measures Performed**

We have designed our conflict minerals due diligence measures to conform, in all material respects, with the framework set forth in the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas and the related supplements for gold and for tin, tantalum, and tungsten.

As part of these efforts, we have established a cross-functional Conflict Minerals compliance team, including representatives from Legal, Procurement, and Regulatory Compliance, and have defined roles and responsibilities for team members and designated members of senior management. The Conflict Minerals team is responsible for the administration and oversight of our due diligence program, including the review and evaluation of supplier responses and the escalation of identified risks. We periodically report the results of our due diligence efforts, including identified risks and mitigation actions, to the Conflict Minerals team and to designated members of senior management.

To identify and assess potential risks in our supply chain, we conducted a reasonable country of origin inquiry and collected information from our direct suppliers using the Responsible

---

Minerals Initiative (“RMI”) Conflict Minerals Reporting Template (“CMRT”). We reviewed supplier responses for completeness, consistency, and plausibility, and we compared the smelter and refiner information provided by our suppliers against RMI’s lists of (i) smelters and refiners that are conformant with the Responsible Minerals Assurance Process (“RMAP”) assessment protocols, (ii) smelters and refiners that have committed to undergo an RMAP audit, and (iii) the RMI’s reference list of known smelters and refiners. For smelters and refiners identified through this process that were not included on the RMI conformant or active lists, or that presented potential risk indicators, we undertook additional review of publicly available information, where available, to further assess the associated risks.

In addition, we engaged a third-party service provider to assist with the collection, validation, and retention of supply chain data, including CMRT submissions, and to support our due diligence efforts. This service provider also assisted in identifying potential supply chain risks and facilitating supplier engagement activities, including follow-up communications, escalation of non-responsive suppliers, and the implementation of additional due diligence and risk mitigation steps where appropriate.

### **Due Diligence Results**

For the 2025 reporting period, Graco requested completed CMRT forms from our in-scope first tier suppliers and received responses from over 63% of the 1,810 in-scope suppliers. The majority of those who responded provided data at a company or supplier-defined level rather than at a product level, and reported that their products do not contain 3TG or, if they do, the 3TG in their products does not come from the Covered Countries. A number of suppliers reported that they do not know whether the 3TG in their products comes from the Covered Countries or from scrap or recycled sources. A small number of suppliers reported that the 3TG in their products comes from or may come from the Covered Countries, and some of these suppliers further reported that some of the 3TG in their products comes from scrap or recycled sources.

Through the third-party service provider, our suppliers identified 360 entities in their supply chains as part of their smelter or refiner list. Of the known smelters or refiners, 217 have been deemed conformant with the RMAP assessment protocols by an independent third party auditor according to the RMI list of conformant smelters and refiners.

Schedule 1 to this Report contains a list of legitimate smelters and refiners identified by our suppliers, and whose materials and components may or may not be in our products. Schedule 2 to this Report includes an aggregate list of the countries of origin from which the smelters and refiners identified on Schedule 1 collectively source 3TG, based on information provided by the RMI.

Given that the majority of suppliers who responded to the survey provided their responses at a company or supplier-defined level rather than at a level specific to the materials and components they supplied to us, we were unable to determine which, if any, of the smelters and refiners listed in their responses were the actual source of the 3TG they supplied.

---

## **Determination**

Due to a combination of incomplete supplier participation, the prevalence of company-level (rather than product-specific) responses, and limited visibility into upstream supply chains, we do not have sufficient information to determine the origin of the 3TG in the products covered by this Report, including whether such 3TG originated from scrap or recycled sources, the specific smelters or refiners used to process the 3TG, or the countries, mines, or locations of origin.

## **Steps to be Taken to Mitigate Risk in 2026**

We intend to take the following steps to improve and enhance our due diligence process to further mitigate the risk that the necessary 3TG in our products finance or benefit armed groups in the Covered Countries:

- Continue to strengthen internal awareness and accountability by enhancing training and embedding conflict minerals compliance requirements into procurement and sourcing processes.
  - Increase supplier engagement to improve CMRT response rates, completeness, and accuracy through targeted follow-up, validation, and escalation as appropriate.
  - Deepen supply chain transparency by seeking more detailed upstream information regarding smelters, refiners, and chain of custody, and by encouraging suppliers to cascade due diligence requirements throughout their own supply chains.
  - Promote responsible sourcing by encouraging the use of smelters and refiners validated as conformant with recognized industry programs such as the Responsible Minerals Assurance Process (RMAP) and by engaging suppliers to address and mitigate identified high-risk smelters.
  - Continue to implement risk-based supplier management practices, including enhanced due diligence and corrective actions where warranted.
-
